1. Last dose on or after the fourth birthday and the last dose of pediatric pertussis before the seventh birthday. **Maximum needed:** six doses.

2. Tdap, which contains pertussis vaccine, is required for students enrolled in the eighth and ninth grade who have completed the recommended childhood DTaP/DTP vaccination series and have not received a Td booster dose within the past two years. **If a student received a Tdap booster the student is up-to-date. Tdap is currently licensed for one dose only; an additional dose is not needed.** For 10-12 grades, a Tdap or Td booster is required 10 years after the last dose of DTaP, DTP or DT. In the event of a pertussis outbreak situation, Tdap may be given at intervals less than 10 years.

3. Kindergarten & 1st Grade: Last dose must be administered on or after the fourth birthday. The interval between the next-to-last and last dose should be at least six months.

2-6 Grades: Last dose on or after the fourth birthday. If all four doses are administered appropriately and received prior to the fourth birthday, an additional dose is **not** needed. Any combination of four doses of IPV and OPV by four-six years of age constitutes a complete series. **Maximum needed:** four doses.

4. Kindergarten & 1st Grade: As satisfactory evidence of disease, an MD or DO may sign and place on file with the school a written statement documenting the month and year of previous varicella (chickenpox) disease.

2-6 Grades: As satisfactory evidence of disease, a parent/guardian or MD or DO may sign and place on file with the school a written statement documenting the month and year of previous varicella (chickenpox) disease.
